INSTRUCTIONS

- All questions carry equal marks. 1/3 part of the mark(s) of each question will be deducted for each wrong answer.
 - Before attempting the question paper, kindly check your Question Booklet (QB) and O.M.R. Answer Sheet and ensure that:
 - Serial number of Question Booklet (QB) and O.M.R. Answer Sheet is same.
 - All pages and all questions are properly printed.
 - In case of any discrepancy/defect, the candidate should immediately report the matter to the Invigilator for replacement of Question Booklet (QB) and O.M.R. Answer Sheet. No claim/objection in this regard will be entertained after five minutes of start of examination, candidate will be liable for the same.
 - Read all instructions on the reverse of O.M.R. Answer Sheet.
 - On O.M.R. Answer Sheet, use blue ball point pen only. Please, fill your Roll No. and other information correctly in O.M.R. Answer Sheet.
 - If more than one response is marked for a question, it would be treated as wrong answer.
 - Each question has five options/circles. First four options/circles A, B, C and D are related to appropriate answer and fifth option/circle 'E' is related to 'Question not attempted'.
 - To indicate the correct answer, the candidate has to fill in only one option/circle A, B, C or D with blue ball point pen for respective question number on the OMR Answer Sheet. If the candidate does not want to answer any question then the fifth option/circle 'E' should be darkened.
 - 1/3 part of the marks will be deducted for the questions, if none of the option/circle options are darkened.
 - If a candidate leaves more than 10 percent questions or does not darken any of the five options, he/she will be disqualified for the exam.
 - Candidate will be given 10 minutes extra to make sure, if he/she has filled up any one option/circle for each questions.
 - If there is any sort of ambiguity/mistake either of printing or factual in nature in Hindi or English version of questions, then the English Version will be treated as final.
 - Use of Mobile Phone/Bluetooth Device or any other electronic gadget in the examination hall is strictly prohibited. If any such prohibited material is found with any candidate, strict action will be taken against him/her as per rules.
- Warning : If a candidate is found copying or using unfair means or if any unauthorized material is found in his/her possession, F.I.R. will be lodged against him/her in the Police Station and he/she would be liable to be prosecuted under State Public Examination (Measures for Preventions of Unfair Means in Recruitment) Act, 2022 and Amendment Act, 2023. The act has provisions of imprisonment of 10 years to life and fine up to ` 10 crore. Board may also debar him/her permanently from all future examinations conducted by the Board.

Read the following passage and answer the questions that follow :

Like Aranmula Kannadi, Balaramapuram Kaithari saree, Killimangalam Mat is Kerala's indigenous heritage product that needs to be marketed globally.

The century old tradition of making mats from the Kora grass that grows abundantly on the banks of Chittur Puzha is dying without any takers in the market.

Sindhu has been making mats for over a decade now and says she had joined the profession as she found the craft fascinating.

The craft of weaving is highly labour intensive and the raw material is costly.

The matured grass is first harvested by the locals and they dry each blade of grass in the sunlight after removing their tissues. The dried grass is then transported to the village for around Rs. 300 per kg as per order. At Killimangalam it again undergoes more treatment processes, including washing, dyeing and boiling before they are sun dried again.

The dried grass is then placed on the handloom and fashioned into intricately patterned mats by the deft fingers of the weavers. An artisan takes a minimum two days to weave a six-feet-long plain mat without any designs on it. The mat is so tight that nearly 2 kg of grass is required to make it. It is the boiling process which makes the mat last for more than 25 years and the dye remains intact. For this reason, the finished mat is a bit expensive and their clientele consists of mostly upper middle-class people and business establishments. A plain mat costs Rs. 2,500 and a designed one can cost up to Rs. 10,000.

They used to get moderate commission from the sales of the mats, which had fairly high demand, especially outside the state and exhibitions were a great way to connect with customers. But with trade shows taking a hit, their revenue streams have been drying up.

Read the following passage and answer the questions that follow :

Come February, love or something like it is in the air. And chocolates fly off shop shelves. This year, however cocoa prices hit record high.

Global chocolate industry is dominated by the “Big Five” - Hershey, Mondelez, Mars, Nestle and Ferrero with West Africa providing most of the cacao. Cacao plants grow only 20 degrees north and south of the Equator. Geography has made South Indian States home to unique varieties of cacao.

Cacao beans are rich in flavanol, which can lower blood pressure. This property has triggered controversial claims about dark chocolate’s medicinal properties. Some of the research supporting these claims has been sponsored by the Big Five. But what’s not in dispute is that cacao is rich in nutrients. It makes its downstream products a potential superfood. But the catch is that the end products such as chocolates contain other ingredients. Sugar or low quality oil, etc. Therefore, its the combination of ingredients and the manner of processing cacao that holds the key.

The last decade, an adventurous breed of Indian chocolates have transformed locally sourced cacao into artisanal chocolates. Getting the most out of cacao’s nutrients and limiting unhealthy ingredients such as refined sugar have been integral to this journey. Vegetable oil and cocoa butter, is often used to lower costs in mass market chocolates. But that’s not an ingredient super premium chocolates will use.

Preserving the nutritional value of cacao depends on the process used to transform it into chocolate. That’s really the key to earning the superfood label. India’s artisanal chocolatiers can get this label without resorting to measures used by the Big Five.

India has a growing consumer base that is discerning and health conscious. Chocolates sourced and made at home, with unique flavours that appeal to Indian and global taste buds, can do even better. If India’s chocolatiers play their cards well, Indian chocolate brands can become super premium, exportable brands.
